

E-commerce Website For Selling Books

Problem Statement

Create an E-commerce website with the following requirements:

- Create a signup page & login page (Users can't see products without login)
- The E-commerce Home page header should have elements such as
 - E-commerce Logo
 - Search box
 - Home icon
 - Cart icon
 - Order History Button
- The E-commerce website should have a product list (Use React to fetch products & display)
- The E-commerce website should have search box (For searching products)
- Every product should have 'Add to cart ' button
- For every product in the cart there should be following features:-
 - Edit Quantity
 - Delete Product

Product Quantity should be Re-calculated after the above operations.

- The order history button on the home page should show a user's order history.

Output:

Login Page -
